## Helpful Hints

- Use headphones or a headset to prevent echo and feedback
- Don't run the app twice in the same room without muting and turning down the speaker on one. Headsets are ok.
- Mute or use spacebar-push-to-talk if you have background noise
- Don't use VPN if it causes audio issues
- Don't start a meeting right on the hour (5 minutes before or after is ok)
- Disable video if bandwidth is an issue
- Early morning meetings have more bandwidth available
